The traditional Wood, made out of ThermoWood, brings the genuine atmosphere of real wood into the bath. The calming, earthy brown colour of the hot tub blends into nature. You can sense the scent of fresh ThermoWood when you step into Wood. Its size makes Wood M suitable for the average family, or why not a get-together with a small group of friends! Wood is the first and best choice for bathers who value tradition and authenticity!

The hot tub is heated with an efficient black Cube heater with a timeless design and colour; it heats even large tubs quickly. It is made out of high-quality marine-grade aluminium.

The heat-treated pine used in the outer shell is a Finnish alternative for dark-coloured imported wood. ThermoWood is a high-quality, long-lasting material with a warm brown colour that maintains its shape well.

The barrel diameter is 170 cm and water volume 1860 litres. It is suitable for 4-6 people. The dry weight of the hot tub is 209 kg. The gross heat output of the CUBE stove is 48 kW and the net heat output transferred to the water is 35 kW.
