Kirami Premium Steady M Flow

Water jets flow system 3kw hybrid Red Cedar, Casual Gray

CAPACITY (PERSONS):	4-6
WATER CAPACITY:	1420 l
OUTER DIAMETER:	170 cm
WEIGHT:	153 kg
PRODUCT LENGTH:	322 cm
PRODUCT WIDTH:	170 cm
PRODUCT HEIGHT:	260 cm
HEATER :	Water jets flow system 3kw hybrid
OUTER COLOR :	Red Cedar
INNER COLOR :	Casual Gray

A new addition to the premium product category is the Steady Flow hot tub. Steady Flow is equipped with an efficient filtration system and electric heating. On one wall of the hot tub, at the seat, there are four adjustable Water Jets water therapy jets. The water jets gently caress your back muscles and skin, making you feel heavenly relaxed. Steady Flow is fully insulated to reduce heat loss and shorten heating time.

In this hot tub, as in all Kirami hot tubs, you can enjoy the closeness to nature without colour changing lights and disturbing loud noises. This allows the surrounding nature itself to be in the centre of attention and a peaceful sense of enjoyment to take over the bather's mind. Could life be any more wonderful?

The Steady Flow hot tub has a moulded-in booster seat to make it easier to get in. The corners of the bench can be used as a backrest and for two people the bench also serves as an armrest. The smooth and light plastic surfaces of the Steady Flow basin allow the optional installation of Kirami's safe LED lights. Factory-installed LED lights create a magical atmosphere for bathing on dusky evenings.

Water Jets Flow System Hybrid includes both the Water Jets flow system and the Macu heater. The Water Jets flow system (water therapy jets) consists of an electric heater, a filtration system and four water therapy jets.

Heater system with 3 kW electric resistance. The heater operates while the filter is on, with a flow switch on the resistor. The estimated heating time is approximately 1°C/hour. A protective hood for the system is included as standard. The electric heating system has a 3 kW resistor with an adjustable thermostat. The second heater in the hot tub is a shapely external grey Macu heater, suitable for heating medium-sized tubs. Heater is made out of high-quality marine-grade aluminium.

The outer shell is made out of North American wood with excellent rot resistance. In time, the wood becomes a beautiful silvery grey. As inside colour, translucent casual grey is frank and carefree. The grey interior is always timeless and elegant, and it blends in beautifully with the environment.

The barrel diameter is 170 cm and water volume 1420 litres. It is suitable for 4-6 people. The dry weight of the hot tub is 171.41 kg. The gross heat output of the Water Jets Flow System 3kW Hybrid stove is 3 kW and the net heat output transferred to the water is 3 kW.
